

[Download](#)

The Delphi 5 help simply says to use the Microsoft Help Workshop to generate the help. She is at the address. C:\Program Files\BORLAND\Delphi5\Help\Tools\hew.exe. If you run it, you will see the following window. If you want to create your own help, you can do so simply by using the Help Workshop program. You can also use HCL to create help in another file, unless you intend to use any of the Windows features to create it. In addition, Visual Basic Help is much larger than Delphi Help. In Delphi 6, you can use the HCL help to create your own functions such as GetDate, GetText, and others.
