Autodesk Exchange, which is published in 2011, is a CAD application that replaces AutoCAD. AutoCAD allows users to create plugins to customize and automate specific workflows. Like the Web, the applications, and their updates, are delivered to a user via an Internet connection and HTTP. AutoCAD, like other desktop applications, can be installed on a client's computer from a CD-ROM, from an Internet download, or from an existing installation file (on a client's computer). AutoCAD and AutoCAD LT licenses for use on a client's computer are often referred to as "Local Hosted" licensing. This means that the licensing information is stored on the client's computer and the client licenses are not downloaded or received by Autodesk. The license information is also called a "Software Product Code" (SPC), Client Code (CC), Local Server Code (LSC) or Client-Server Code (CSSC). It is possible to download and install AutoCAD or AutoCAD LT on a server and use that as a virtual installation and remote access client for other clients. This use of a Local Hosted server is called Client-Server licensing.
